

# What Did They Say?

People get news from many different places or **sources** such as the newspaper, magazines, social media, and websites. To find out if a story you read or hear about is true, you have to look for 2-3 credible sources. Credible means reliable and trustworthy. **Primary sources** are the most credible. Examples of primary sources include speeches, letters, photographs, diaries, and newspapers.

**Mark each headline as true, partially true, or not true at all.**

Have you heard a story that you thought was exaggerated or not true? What tips would you share with a friend on finding stories that are true?
